

CBRNE (DETECTOR/DECON KITS)

M256, M256A1, M291, M291A2, M258, M258A1, M72A2, M58A1, M295

POSSIBLE AREAS OF CONCERN

Contaminants of concern in the kits represent possible flammable and toxic hazards. Refer to MSDS for specific use and handling procedures.

CHARACTERIZATION

The refill kit, when disposed of, is a **hazardous waste** for ignitability and toxicity.

HANDLING PROCEDURES

- Step 1** Contact **Environmental Division Hazardous Waste** to establish a Satellite Accumulation Point (SAP) for hazardous waste.
- Step 2** Unit will be issued containers for kits. Unit will be required to segregate kits by type.
- Step 3** When a SAP container is full, mark the fill-date on the lid of the container and contact **PPOC HazWaste Pick-Up** for turn-in appointment.
- Step 4** Take container to PPOC at scheduled appointment time.

NOTE: SAP Containers are reusable and property of the government. Continue to use the container and do not remove from unit location unless they are turned in to PPOC.

NOTE: SAP operations require OSHA annual training as presented in SAP refresher training.

NOTE: If the unit is deployed for training or mobilized for a period greater than 10 days, and SAP is not needed, turn in the waste through PPOC, and submit a SAP closure memo to the Environmental Division.

CBRNE Detector/ Decon Kits

Check the JEAP website for chemical items that may be able to be returned for training purposes:

M8; M9, M291; M295, M100,

GENERAL INFORMATION

M256/M256A1 and M258/M258A1 kits are turned in to PPOC.

M291/M291A2 and M295 kits are turned through the JEAP (DoD Joint equipment Assessment Program) RSDL-Reactive Skin Decontamination Lotion-dispose of used/expired kits in refuse.

CBRNE kits not covered by this protocol, contact **Environmental Division Hazardous Waste**.

NOTE: M8 and M9 detector paper is disposed through DRMO, contact supporting **SSA** or **DLA Disposition Services**. See page A-22, CBRNE Protective Mask Filters.
