

CARDBOARD

POSSIBLE AREAS OF CONCERN

Cardboard contaminated with cooking oil, wax, food, dripping oil and fuel cannot be recycled and should be disposed of in an appropriate garbage container.

CHARACTERIZATION

Fort Campbell's Installation Recycling Policy (see Appendix D) mandates all installation activities, tenants, contractors and tenant organizations participate in the recycle programs. Sale of cardboard supports the MWR programs.

HANDLING PROCEDURES

Step 1 Place flattened cardboard in light tan cardboard recycling or cardboard compactor. Cardboard that will not fit inside the dumpster **MUST NOT** be placed in front of the dumpster, but may be placed to either side, within 10 feet, to be picked up by the contractor or taken to the **Recycling Convenience Center**.

Step 2 Close lid of container or door of compactor.

NOTE: If cardboard container is not available, take cardboard to the **Recycling Convenience Center**.

Cardboard Receptacles

GENERAL INFORMATION

FC Family Housing has curbside collection serviced weekly on the same day as garbage service. Accepted materials are paper/cardboard. For more information, contact **FC Family Housing Office**. For issues of dumpster service/empty, contact **DPW Contract Management Branch**. For dumpster location, contact **Environmental Division Solid Waste/Recycling**.
