Put your experience to work with Volt

**VOLT** Military Heroes Program

## Quality Engineer – Ankeny, IA

**Compensation: \$65k/\$75k per annum (DOE)**

**Type: Direct**

### **Summary of Duties:**

The Quality Engineer provides support to Manufacturing, Engineering, and customers through reporting and analysis of data, development of Quality Planning documentation, and execution of the Quality Management System.

- The Quality Engineer provides support to Manufacturing, Engineering, and customers through reporting and analysis of data, development of Quality Planning documentation, and execution of the Quality Management System.
- Works to complete First Article Inspection Reports, Production Part Approval Process documents, and customer prescribed qualification requirements in prescribed formats including written narrative, as necessary
- Reviews customer drawings, specifications, and supporting documentation for quality requirements and assesses appropriate means of meeting customer expectations through all phases of product/process development, from quoting to production and on-going support
- Coordinates the creation and maintenance of FMEA's, Control Plans, and other Product Quality Planning documents with a cross functional team
- Inspects and tests products at various stages of the production process using a variety of measuring and testing equipment
- Compiles and evaluates statistical data to determine and maintain quality of products and processes.
- Provides assistance to Production employees regarding quality/measurement issues
- Plans measurement techniques and systems to support the accurate and timely gathering and evaluation of data. Sets up, conducts and analyzes GR & R studies
- Communicates with suppliers regarding material complaints, material certificates, and corrective actions, etc.
- Trains other employees regarding new and existing in-process inspection techniques.
- Reports quality problems to the Quality Manager
- Updates and Maintain appropriate quality records

### **Requirements:**

- Must be a **Non-Smoker** to apply for the job (Clean room environment)
- Applicants must have a strong background in statistics/SPC, metrology, measurement techniques and processes
- Prior quality knowledge and experience in medical parts manufacturing is preferred (ISO 13485, FDA Title 21)
- Experience or training in the use of testing and measuring equipment such as microscopes, visual systems, digital indicators and micrometers is necessary
- A Bachelor's degree or its equivalent and at least five years' experience in Quality in a manufacturing setting is required
- ASQ CQT/CQE certification a plus
