

Aircraft Mechanic

Company Description:

Aerotek Aviation is global leader in staffing and recruiting with more than 200 offices in the United States. We partner with aviation companies worldwide. We specialize in the placement of A&P Mechanics, Aircraft Electricians, Aircraft Painters, Avionics Technician, Back Shop Support, Component Overhaul Technicians, Composite Mechanics, Engine Mechanics, Engineers, Inspectors, Maintenance Control, Planners, Schedulers, Structure Mechanics, and Supervisors in permanent and contract positions.

Our client is currently seeking several avionics technicians based on the growth they have received from their clients and government contracts. They do perform maintenance on rotary wing aircraft to include the UH-60.

Job Opening: Aircraft Mechanic

Location: Huntsville, AL

Job Description:

The Aircraft Mechanic is responsible for servicing, repairing, and overhauling aircraft engines to ensure airworthiness. They are responsible for repairing, replacing, and rebuilding aircraft structures, such as wings and fuselage, and functional components including rigging, surface controls, and plumbing and hydraulic unites, using hand tools, power tools, machines, and equipment such as shears, sheet metal brake, welding equipment, rivet gun, and drills. Candidates will be reading and interpreting manufacturers' and airline's maintenance manuals, service bulletins, and other specifications to determine feasibility and method of repairing or replacing malfunctioning or damaged components.

Position Qualifications:

3+ years' experience as an Aircraft Mechanic
UH-60 or AH-1 experience is required
Phase maintenance or RESET experience preferred
A&P License is not required but is preferred

Salary:

Based on experience

Tools:

No tools are required for this opportunity
