

Developer Advisor, Solutions Engineer Advisor Sr job family - 120948

We are recruiting for one of the following two job levels: Developer Advisor; Solutions Engineer Advisor Sr.

Location: 3350 Peachtree Rd., Atlanta, GA 30326

Responsible for participating in all phases of the development and maintenance life cycle, typically for an assigned business unit or corporate department and utilizing various customer technology platforms.

Major Job duties and Responsibilities:

- * Maintains active relationships with customers to determine business requirements.
- * Collaborates with engineers and graphic designers, analyzes and classifies complex change request and reviews and evaluates possible enhancements.
- * Works with development team to develop and define application scope and objectives and prepare functional and/or technical specifications.
- * Analyzes and evaluates detailed business and technical requirements.
- * Codes and maintains complex components of information systems.
- * Mentors others on coding standards and performs code reviews.
- * Develops and performs system testing and fixes defects identified during testing and re-executes unit tests to validate results.
- * Aids in integrating activities with other IT departments for successful implementation and support of project efforts.
- * Provides on call support and monitors the system and identifies system deficiencies.

Qualifications:

Developer Advisor level requires:

- * AA, BA/BS degree or technical institute training in related field, 3+ years' experience on one platform, multi database, multi-language or multi business application or any combination of education and experience which would provide an equivalent background.
- * 5 or more years related experience; multi-platform experience; expert level experience with business and technical applications, or any combination of education and experience, which would provide an equivalent background.
- * Incumbent should also have the ability to mentor others, lead multiple small projects and provide troubleshooting support.

Solutions Engineer Advisor Sr. requires:

- * Above plus 7 or more years related experience; multiplatform experience, and expert level experience with business and technical applications; or any combination of education and experience, which would provide an equivalent background.
- * Lead multiple large projects and provide troubleshooting support.

Skillset: Both level roles will require:

- * Web Developer responsible for programming on specific application subsets of the company's application portfolio, participating in all phases of the development and maintenance life cycle, typically for an assigned business unit or corporate department and utilizing various customer technology platforms.
- * Requires hands-on experience in solutioning, architecture, design and development of scalable and secure high traffic systems.
- * Proficiency in Web Development and Web Services programming
- * Expert experience in JavaScript Frameworks AngularJS, ReactJS, jQuery, Express and one or more of the following: Dojo, Backbone.js, Ember.js or Ext JS.
- * Experience in one or more of server side scripting languages: Node.js, Perl or PHP.
- * Experience in HTML5, CSS3 and one or more of the Responsive CSS Frameworks like Bootstrap or Foundation.
- * Experience in one or more RDBMS Oracle, DB2 or MS SQL.
- * Experience in one or more NoSQL databases Mongo, Couchbase or Cassandra.
- * Experience in OLAP and one or more of Web Analytics like Google Analytics or Adobe Analytics.
