

Entry Level Program Engineer - Job ID: 11730

Dearborn, MI

Remove Date: November 8, 2016

At Roush, we fuse technology and engineering to provide product development solutions to customers in a diverse range of industries. Widely recognized for providing engineering, testing, prototype, and manufacturing services to the transportation industry, Roush also provides significant support to the aerospace, defense and theme park industries. With over 4,000 employees in facilities throughout the United States, Europe, Asia, and South America, our unique combination of creativity and tenacity activates big ideas on a global stage. We want motivated, ambitious people who put the needs of our customers first, bring creativity to their work and will do whatever it takes to achieve success. If you share our passion for providing innovative solutions to complex challenges, we want you on our team.

Roush is in search of an Entry Level Program Engineer that is interested in learning more about vehicle durability. The Program Engineer would lead design validation test planning, issue resolution, root cause analysis, and assist with procedure development. This person will have high visibility and interact with engineering teams from each vehicle sub-system. This opening is located in Dearborn, MI.

Qualifications

- Bachelor of Science or higher in an engineering discipline (Mechanical, Electrical, Automotive, Structural, etc.).
- Must have a general understanding of vehicles, sub-systems and their individual components.
- Must understand general mechanical testing, instrumentation, and data collection methods.
- Must have excellent organizational and planning skills.
- Must be able to communicate technical information both verbally and in writing.
- Must be capable of assertive but polite communication while interacting with a variety of personalities.
- Must possess strong prioritization skills to work in a periodically fast paced environment.
- Must be a self-starter, self-motivated and willing to learn.
- Must possess strong computer skills, including: MS Word, MS Excel, and MS Outlook or equivalent.

Preferred Skills

- 1 to 4 years of experience with mechanical testing involving powertrain or structural systems/components.
- Ability to manage test resources, make decisions and provide direction.
- Desire to gain broad exposure to full vehicle destructive durability testing.
- Interest and/or knowledge of trucks and vans is a plus.
