

Information Assurance Systems Engineer - MacDill AFB, FL (TS/SCI) Advanced C4 Solutions

AC4S is seeking an experienced, highly skilled, self-directed, Information Assurance Systems Engineer supporting our clients Fort Campbell.

About Advanced C4 Solutions: AC4S was founded by 3 military veterans deployed in a tactical, austere mission environment. They envisioned industry augmenting our military forces with commercial, industry-best-practices-based IT Services and Solutions, rapidly deployable worldwide. AC4S has evolved into a highly skilled team of professional IT and communications engineers, planners and operators with a deep affiliation and history supporting the Joint Communication Support Element (JCSE) and other DOD and Intelligence Community entities. AC4S provides services and solutions support in four main lines of business: C5ISR, Cyberspace Operations Services and Solutions, Professional Support Services and Mission support services.

Duties:

- Serves as primary engineer and Information Assurance SME for cyber security on an Army tactical network.
- Provides system analysis, planning and implementation of network security measures such as firewalls, intrusion detection systems, host intrusion protection systems, and antivirus.
- Will enforce compliance standards by conducting networks scans and remediate systems that are out of tolerance.
- Maintains the standard operating procedures that support the Army Information Assurance Program (AIAP) for FORSCOM elements stationed at Fort Campbell; Serve as SME for the Division and Brigades IAMs / IASOs, interpret FORSCOM and DA directives and provide continuity for the Brigades and Division during deployments and during personnel rotations; plans for anticipated training requirements upon the units return. Responsible for management and implementation of all Information Assurance Programs.
- Performs configurations of networking service devices, troubleshoots network systems, and assist in network/service configuration management and policy creation and implementation.
- Develops the standard Tenant Security Plan (TSP) in accordance with the Department of Defense Information Assurance Certification and Accreditation Program (DIACAP) Requirements.
- Implements and maintains a secure network environment by ensuring all Information Assurance security patches are installed on the network in accordance with Information Assurance Vulnerabilities Alert Management (IAVAM).
- Maintains and evaluates unit level training requirements for all FORSCOM units on Fort Campbell.
- Conducts the Senior Commanders Information Assurance Command Inspection Program.
- Ensures compliance with security principles and methods.

Requirements:

- Eight (8) years engineering experience in C4ISR related program to include multiple areas of: hardware or software design, analysis, systems administration, network design, system/equipment support, or test and evaluation.
- Experience: computer network support, to include: installation and maintenance help desk support, network configuration and monitoring, telephone support, and system administration.
- Must have Security + certification.

An Equal Opportunity Employer, including disabled and vets
