Lead Firefighter (Kabul Afghanistan)

Major Duties: Serves as Crew Chief with responsibility for one or two major pieces of firefighting apparatus and a crew of 3-6 Firefighters assigned to a shift, and serves as Station Captain when assigned.

Responsibilities and Duties:

- Responds to fires and other emergency situations and directs crew in placing of apparatus, in applying agent applications, etc. and coordinates operations.
- As required, assumes responsibility for the entire firefighting operations (serving as the Incident Commander) until the arrival of a senior fire officer.
- Directs the crew in firefighting activities, working from special orders from higher-level supervisors at the scene.
- Directs the crew in fire protection inspection functions.
- Checks on work in progress and reviews completed work, amending or rejecting work not meeting established standards and refers to supervisor questions or matters not meeting performance standards.
- Ensures that personnel and equipment are in a constant-state-of-readiness for immediate response to any firefighting and rescue operations.
- Maintain oversight of daily vehicle and equipment operational inspections/checkouts and preventive procedures.
- Performs fire protection related technical duties; coordinates the return of installed fire suppression and detection systems to operational status after activation.
- Performs fire prevention/fire safety inspections prior to issuing permits for welding and cutting and other hazardous operations.
- Operates assigned rescue, fire suppression (structural), hazardous materials, and support vehicles necessary to perform assigned duties.
- Responds to hazardous material/CBRNE incidents, surveying scene for the purpose of stopping or controlling the release.
- Identifies hazards, collects and interprets data, determines damage to container, assists with development of strategy and tactics.
- Performs advanced control and confinement operations such as cooling, plugging, or patching containers, applying diluting sprays or neutralizing agents and/or constructing dams and/or dikes while utilizing specialized personal protective clothing, instrumentation and equipment.
- Performs duties of an assigned position within the incident management system.
- Assists in briefings, critiques and prepares reports and documentation.
