DevOps Engineer (82474BR)

We are looking for a DevOps Engineer to define and configure Application Deployment Blueprints in a Private Cloud PaaS platform. You will also assist in automated deployments of applications. Ideal candidate must have worked in high performance, highly complex deployment environments and done hands on Dev Ops automation.

- Define and develop plans for DevOps infrastructure improvements
- Configure Application Deployment Blueprints in a Private Cloud PaaS platform
- Assist in automated deployments of Java and non-Java applications
- Support process re-engineering activities

Clearance: Secret (TS preferred)

Location: Stafford, VA

Systems Administrator, Journeyman (83447BR)

Provide functional and empirical analysis related to the design, development, and implementation of software systems, including, but not limited to application software, utility software, development software, and diagnostic software.

- 3Manage DNS objects
- Configure Group Policy IAW DoD Security Standards
- Create and organize system backups
- Review Server logs for anomalies
- Troubleshoot Server and Client issues as they arise
- Create and maintain systems documentation
- Bachelor's Degree and 3 years of experience
- 3 additional years of experience in lieu of a degree

Capture Director, Navy/NAVSEA (82898BR)

Seeking a top capture management professional that understands the mission of Department of Navy and its major components, including Naval Sea Systems Command (NAVSEA)

- Working knowledge of other key organizations specifically to include NAVSEA HQ, PEO/PMS, SEA 04/05/06/07/21 and Echelon III Commands such as NSWCDD, NSWCCD, and NUWC are essential.
- Track record of successful capturing and winning \$50M to \$100M new business RFPs
- Bachelor's degree with a minimum of 10 years of related experience.
- Prior NAVSEA sales/business
- **Clearance:** Secret Clearance Required

Location: Herndon, VA

Sales/Business Development Director, Health (82342BR)

Seeking a seasoned professional who understands the mission and vision of the Federal Health market segment. The ideal candidate will have demonstrated understanding of strategic information technology objectives including; providing secure and trusted IT environments, data quality, availability, and interoperability; providing innovative enterprise IT infrastructure; and improving integration and quality of health information

- Bachelor's degree with a minimum of 10 years of related experience. Prior HHS (or relevant operating division) business development/capture management experience is required

Clearance: None, ability to obtain Clearance

- Windows Server 2008/R2, 2012/R2
- Security + CE explicitly required to start
- Windows 7
- Windows 10
- Linux/Unix **Clearance:** Secret

Location: Aberdeen, MD

Network Center Operations Analyst (84370BR)

Serve as a Network specialist responsible for managing, monitoring and troubleshooting the classified and non-classified IP and Transport Networks consisting of Cisco and Juniper routers, Optical cross-connect platforms, Multi service provisioning platforms, IP and ATM switches, fiber/copper connectivity, Sun workstations, and misc. network equipment.

Clearance: Top Secret

Location: Pearl Harbor, HI

Software Engineer/Developer (83701BR)

- Developing software using an interpreted language (Python, Ruby, PHP or Perl)
- Developing applications for deployment on a HP-UX platform
- Coding and reviewing Java, C/C++, HTML, and/or JavaScript
- Writing Make files to build C/C++ applications
- Configuring, administering, and developing on Linux environments
- **Clearance:** Secret

Location: Charleston, SC

Network Engineer Remediation/Administration (83705BR)

- Reviewing security findings (e.g., from ACAS/Nessus Scans, HBSS Reports, IPS events), researching solutions, and applying changes to remediate or mitigate the findings.
- Experience on Federal or commercial Unix/Windows Servers and network design efforts.
- Experience applying Security Technical Implementation Guidelines (STIGs), configuring, and administering routers and switches (Cisco) in the past two years to a network enclave with up to 100 devices.
- Configuring and administering EMC storage and/or other vendor Network Access Storage (NAS) and Storage Area Network (SAN) products.

Clearance: Secret

Location: Charleston, SC

Virtualization/Storage Engineer (837006BR)

- Experience in designing, testing, implementing, and accrediting an enterprise blade server and servers for Cisco, dell, and HP servers running ESXi, Redhat and Windows.
- Experience in developing a System/Subsystem Specification (SSS) or System/Subsystem Design Description (SSDD).
- Experience in configuring and administering EMC storage and/or other vendor Network Access Storage (NAS) and Storage Area Network (SAN) products.
- Experience in troubleshooting and administering enterprise compute and storage solutions (VDI, VMWare, SAN, NAS, FibreChannel, FCoE).

Location: Herndon, VA

Technical Proposal Writer, Principal (82496BR)

Principal Proposal Writer within the Proposal Operations team, working with Proposal Managers and Proposal Coordinators. In addition, work with technical and management personnel within business operations, capture managers, and corporate support personnel within ManTech Mission Solutions & Services group.

- Provides draft and final input to technical, management, past performance, or personnel sections of proposal volumes, working with subject matter experts to translate technical information into proposal text in response to RFP requirements.
- Bachelor's degree in Journalism, English or comparable area, and seven to nine years of related technical and proposal writing/editing experience.

Clearance: None, ability to obtain DoD Secret Clearance

Location: Herndon, VA

Trains aircrew members in GPS use relative to ground navigation and rescue operations. Develop course training materials and documents required for training personnel. Present formal academic lectures to aircrew members attending course at the RSAF STC. Personnel will complete duties relative to training, planning, and development of curriculum, test and measurement devices, revision, evaluation, and monitoring of all phases of the Survival Training Center.

- High School education or higher. Completion of USAF Basic Survival Training Course (SVSOA) and USAF Survival Training Instructor Course (51/81A) is mandatory.
- Must have 2 years in the last 5 years as a Survival Training Instructor.
- Must have at least 4 years' experience in the application of military related survival principles and techniques and use of USAF/RSAF post egress life support equipment.
- **Clearance:** None

Location: Saudi Arabia

Academic Simulator Training Instructor (80014BR)

Conducts classroom academic as required in the F-15S training syllabus. Conducts Pre-briefing trainer instruction and debriefing in accordance with the course documents. Performs additional training center support duties as directed to include but not limited to developing training schedules, performing quality control. Maintenance records and test development/administration.

- Minimum of 1000 hours total flight time.
- Previous fighter experience in F-15E, F-15C, or F-15S as instructor or equivalent.
- Previous experience as an academic platform instructor.
- Graduate of USAF fighter weapons school in preferred
- Qualification in tactical aircraft listed above within preceding 5 years or qualified as a contract instructor listed within the preceding 2 years.

Clearance: None

Location: Saudi Arabia

Senior Financial Systems – ERP Analyst-SME (83710BR)

- Experience in designing, testing, implementing, and accrediting an enterprise network, security, compute, and storage infrastructure for Cisco routers, Cisco switches, Cisco firewalls for architectures consisting of at least devices.

Clearance: Secret

Location: Charleston, SC

C# Software Developer (82652BR)

- Proficiency in developing MS Windows software applications using C++, C# and .NET 3.5/4.0;
- Proficiency in n-tiered development architecture SQL database experience, specifically SQL Server

Clearance: Secret

Location: Lexington Park, MD / Patuxent Naval Air Station

Contact email: joe.rozengota@mantech.com

Systems Engineer/Scientist III (82717BR)

- At least four years of the foregoing total experience shall have consisted of specific experience in ID, ECMS, ATC equipment, systems and subsystems, and advanced identification waveforms. Familiarity with Xilinx FPGA, C/C++ and/or, VME architecture are required. Proficiency in n-tiered development architecture SQL database experience, specifically SQL Server
- Uses IEEE ISO/IEC 26702:2007, Systems engineering - Application and management of the systems engineering process; 12207:2008 - IEEE Systems and software engineering - Software life cycle processes and the SEI CMMI for Development, Version 1.3 model for guidance in providing systems and software engineering products and services.

Clearance: Secret

Location: Saint Inigoes, MD

Network Center Operations Analyst (84376BR)

Serve as a Network specialist responsible for managing, monitoring and troubleshooting the classified and non-classified IP and Transport Networks consisting of Cisco and Juniper routers, Optical cross-connect platforms, Multi service provisioning platforms, IP and ATM switches, fiber/copper connectivity, Sun workstations, and misc. network equipment.

Location: Sinai, Egypt

WIN-T Field Engineer - (84249BR)

are from many disciplines and from multiple agencies and organizations. Subject matter experts (SME) are used to assist these working groups. Responsibilities of this position include identifying, selecting and utilizing SMEs from both the government and the commercial sectors.

Clearance: Secret is required - eligible for TS/SCI

Location: Alexandria, Virginia

Information Computer Telecommunications Specialist - Principal (83959BR)

- Must hold or be able to obtain at least a CompTIA Network+ or equivalent industry certification
- Must be able to certify at Information Assurance Technical Level II (IAT II)
- Strong Transmission Control Protocol/Internet Protocol (TCP/IP) switching and routing skills
- Strong Voice over Internet Protocol (VoIP) skills
- Understanding of VPN hardware implementation
- Understanding of cellular data standards including 3G, 4G, 4GLTESWAP

Clearance: Secret

Location: Sierra Vista, AZ

BICES Network Engineer (82640BR)

- Eight years or more network engineering experience in the design, testing, implementation, and sustainment of information sharing network solutions to include knowledge of satellite and terrestrial communications, at least three of which include working in support of military intelligence with specific experience supporting special operations forces and at least two years' experience deploying or actively supporting coalition or bilateral military information sharing efforts. Experience performing assessments during DoD exercises.
- 8 years or more of military intelligence experience

Clearance: TS/SCI

Location: Fairfax, VA

BICES Records and Deliverable Manager (82638BR)

- Records Management Experience in a DOD environment
- Experience with SharePoint

Clearance: TS/SCI

Location: Fairfax, VA

Engineering Technician (82684BR)

- Experience working on F-15 Super Hornet Jet (preferably on the landing system)
- Experience working with the electronics and wiring harnesses (preferably on the "Inspection" level)
- Possess the ability to read schematics and IETMs (Interactive Electronic Technical Manuals)
- Must be able to travel up to 75% (underway on detachments on Aircraft Carriers)

Clearance: Secret

Location: Aberdeen, MD

Configuration Manager (83582BR) – 100% Telecommute

- Responsible for providing Vista Imaging maintenance and sustainment and Tier 3 user support services to VA and Health and Human

- Provides hardware and software repair, replacement, troubleshoot, installation and Over-the-Shoulder training support for the Warfighter Information Network-Tactical Increment 1 (WIN-T Inc 1).

- The WIN-T Inc 1 is a communications network that provides the Army Warfighter with voice, data and video capabilities for use in a tactical environment, utilizing primarily commercial off-the-shelf (COTS) equipment.

- Create a database design specification

- Security + CE certification IA Level II (required)

Clearance: Secret

Location: Vilseck, Germany

JADOCs Field Service Engineer (FSE) - (84346BR)

Joint Automated Deep Operations System (JADOCs) is a command and system tool that helps provide strategic coordination and situational awareness at the operational and tactical levels of combat. The system provided real-time tracks, target databases and service-specific fires information into a single software application.

- Interface JADOCs to external C4I systems.
- Implement and operate JADOCs at designated site(s) - Install, configure and maintain JADOCs server(s) & workstations.

- Security + CE certification IA Level II (required)

Clearance: TS/SCI

Location: Stuttgart, Germany

Test Engineer, Associate (83385BR & 83386BR)

- Performing various tests on software systems, defining test parameters, designing test procedures, interpreting test results and analyzing test trends
- Support will be required for investigation and analysis of unique customer related test failures.

Clearance: Public Trust

Location: Herndon, VA

Software Developer Associate (83387BR)

- Strong Java software development and integration skills in the JBOSS and Linux environment
- Technical position with an Agile Scrum team that will require a broad scope of skills from gathering user stories from end users to integration of applications into a working system and writing/ executing technical specifications, to production deployments

Clearance: Public Trust

Location: Herndon, VA

Systems Administrator(83389BR)

- Manages ongoing integration and sustainment of an enterprise image repository
- Provide systems integration and administration support to one of our premier programs in the Military Health Systems.

Clearance: Public Trust with NAJLC

Location: Centreville, VA

Systems Safety and Environmental Engineer (83544BR)

- Provide systems safety and environmental engineering support to the U.S. Air Force Space and Missile Systems Center (SMC) New Entrant Certification Team (NECT) to certify the capability of potential New Entrant launch vehicle providers to provide launch services for Department of Defense (DoD) National Security Space

Services sites currently utilizing VistA as part of their patient record

- Ability to work with automated build process development including Batch scripts, Maven, MS InstallShield, MS Visual Studios 2005/2010, Delphi 2007

Clearance: Public Trust

Location: Telecommute

Database Administrator (83727BR)

- Provides subject matter expertise and support for a central data repository that captures, aggregates, transforms, and organizes data to support data analytics' and data reporting in a Big Data High Availability environment.
- Work effectively in an enterprise environment that supports enterprise applications such as Oracle, Hadoop, Cognos, SAS, Informatica, and Pentaho.

Clearance: Public Trust

Location: Chantilly, VA

Test Engineer (83733BR)

- Responsible for testing the functionality of links, formatting, layout and accuracy of all content in .xml format in multiple environment's (Fun-Test, UAT, Train and Production)
- Develop and maintain Test Cases for application release testing.

Clearance: Public Trust

Location: Baltimore, MD

Cyber Security Watch/Duty Officer (84402BR)

The DISA Command Center (DCC) Network Assurance (NA) mission is charged with directing the operation and defense of the Global Information Grid (GIG)/DoDIN. DCC NA is chartered to provide 24x7x365 operational Information Assurance (IA) support to the Department of Defense (DOD) community via response and coordination of computer security incidents and near real-time strategic computer network defense (CND) analysis. The DCC correlates and analyzes all-source intelligence, counter-intelligence (CI), network monitor/performance data, Intrusion Detection System (IDS) data, law enforcement, and operations information to provide the DISA Director an integrated picture of daily enterprise services status and emergent computer/network incident details. With correlated information and reporting from subordinate NetOps centers, the DCC NA assesses network and military operational impacts, identifies courses of action that mitigate, recover and restore network services, prepares plans to execute corrective measures, and coordinates implementation and follow-up of approved actions with appropriate DOD and non-DOD organizations. The DCC exercises tactical control over DISA's CND elements integrated into subordinate DISA Net Ops Centers (DNC) and Enterprise Service

Clearance: Top Secret/SCI

Location: Fort Meade, Maryland

Enterprise Systems Engineer - VMware (82847BR)

The Senior engineer will be a member of a team responsible for driving and defining IT standards, maintaining relationships with the technology vendor's and product engineering teams, while working within technical guidelines, and providing tiered support to the operations of the program. This position requires extensive experience working

(NSS) missions on Evolved Expendable Launch Vehicle (EELV)-class launch vehicles

Clearance: Secret

Location: Cape Canaveral, FL

HTML Developer (83732BR)

- Responsible for deployment requests in Word Format and running document through a Word to XML/HTML converter tool and deploying the converted Content to multiple environments (Fun-Test, UAT, Train and Production)

Clearance: Public Trust

Location: Baltimore, MD

Data Architect (83577BR)

We are looking for a Data Architect to develop a common dictionary that unifies languages used across multiple systems. This project will address an immediate need for a common vocabulary that helps accurately map and bridge gaps between the disparate languages used across the multiple disciplines, data formats, and dictionaries. The ultimate goal is enhance standardized information sharing to enhance interoperability between systems.

- Experience working with stakeholders to define user and data requirements for information exchange between systems

- Experience creating, modifying, and developing of enterprise data management standards and processes

- Experience with XML data and data exchange implementations (especially NIEM standards)

Clearance: Secret (TS preferred)

Location: Stafford, VA

Info Sys Security Specialist /CND Analyst (84382BR)

- White House Communications Agency (WHCA) key member of the Network Assurance Team. The team is engaged to support 24x7 response to customer requests for assistance and providing overall accurate picture of the well-being of WHCA networks and enclaves with regards to Network Assurance activity directed against the customers' assets.

- Provides technical support, analysis, and recommendations in the areas of:

Surveillance and Reconnaissance
Perimeter Defense
Malicious Software (Malware) Analysis
Attack vector analysis
Computer Network Defense (CND)
Incident Handling
Vulnerability Management/Reporting,
Risk Analysis and Readiness
Strategic Planning Analysis

- 5+ years' experience

- Strong operational expertise is required in one or more of the following tools: Splunk, Palo Alto, Network Firewalls, SourceFire/Cisco, BRO, AirTight, HBSS

Clearance: TS/SCI (will process for Presidential Support)

Location: District of Columbia
