## Network Configuration Manager, C4I System Information Systems SME | San Diego, CA

**Position:** Network Configuration Manager, C4I System Information Systems SME

**Description:** Provide configuration documentation support of C4I networking systems and attached subsystems, capturing and managing onboard systems interface and baseline configurations in accordance with ISEA and Program Office direction for force-level ships.

**Security clearance required:** **MUST have an Active DoD Secret Clearance**

**Education:** BS/BA required

**Experience:** 7+ years of U.S. Navy shipboard experience

**Salary:** 80K-95K

**Amount of travel:** 25%

**Location:** San Diego, CA

### **Scope of Effort Tasks:**

- Provide pre-event and post-event configuration management validation support for all C4I systems onboard designated force level ships. Provide documentation of unique shipboard operational and interoperability baseline settings through the development of graphically rich presentation of the network environment for reference, troubleshooting and training.
- Develop capture plans, execute and evaluation cyber network scan results, document signal flow analysis, conduct system forensic analysis (planned to actual results).
- Provide technical analysis support of system SOVT's completeness and relevancy to SOT testing, prior to each test event, reducing testing overlap and ensuring completeness of system assessments.
- Provide continuous process improvement support of the SOT planning and execution process, while providing recommendations and for systems SOVT.
- Comprehensive Sys Admin and/or a variety of C4I systems knowledge is a plus.
- Provide pre-event (DGSIT) configuration validation support.
- Travel when necessary to support system of systems data collection and validation efforts.
