

Windows Server Systems Administrator

About the Job:

As a Windows System Administrator, provide enterprise server support for the Army IT infrastructure. Build, configure, and administer Windows-based systems in support of multiple mission areas. Ensure all Windows-based systems are compliant with current DoD and Army regulations. DUTIES INCLUDE:

- Daily checks on Windows 2008 R2 and 2012 R2 servers to monitor the status and the state of the servers
- Install, configure, and administer servers and troubleshoot issues as needed
- Provide advanced network technical support
- Perform IAVA vulnerability scans using SCAP and Nessus scanning software
- Participate in rotational on-call duties to provide after-hours support

Minimum Qualifications:

- **Must have IA II certification(Security+ or equivalent) prior to hire**
- **Must acquire MCTS 70-640 or 70-642 (or higher) within 6 months of hire**
- HS + 7yrs similar experience, or AA/AS + 5, or BS/BA + 3

Background Needed and Years of Experience:

Technical Skills:

- Extensive knowledge of PC/server hardware and software maintenance
- Experience with Windows Server 2008 R2 and 2012 R2 administration
- Experience with physical (Dell, HP, IBM) and virtual (VMware) servers
- Knowledge of Windows Active Directory services
- Knowledge of DISA STIGs, IAVAs, and FDCC guidelines
- Proficient with TCP/IP network protocols
- Extensive experience in troubleshooting server and network issues
- Familiarity with Symantec antivirus and other security software such as McAfee HBSS
- Familiarity with Microsoft System Center Configuration Manager (SCCM)
- Familiarity with Assured Compliance Assessment Solution (ACAS)
