

Senior Chassis Engineer - Job ID 11462

Allen Park, MI

Remove Post: August 8, 2016

Roush supplies comprehensive, integrated development services and provides customers with support that fuses technology and engineering. From design through prototyping, testing and manufacturing, we take our customers' visions from the sketch pad to production. We're focused, efficient, and we deliver. With over 3000 employees in more than 40 facilities across the United States, and interests around the world, Roush solves customers' problems and provides significant support to the automotive, performance products, military, entertainment, alternative fuels and consumer products industries. We are focused on performance, driven by technology, and committed to our customers' success. If you're only happy when your customers are happy, we want you on our team.

Are you an experienced Chassis Engineer looking for a dynamic company to join? Due to our steady growth, we have an immediate opening for a Sr. Chassis Engineer. The Sr. Chassis Engineer will be responsible for the design, release, and development of various chassis system components. The ideal candidate must show a capacity to quickly understand the implications of the development of new technology within the automotive industry and be ready to efficiently respond with creative, experienced based design solutions. This position is located at our Allen Park, Michigan facility.

Qualifications

- Bachelor of Science in Engineering (Mechanical Engineering strongly preferred)
- Minimum five years of experience in the area of vehicle chassis systems: frame / structures, suspension, steering, brakes and/or vehicle dynamics.
- Experience in all aspects of production and prototype chassis engineering technology and product development.
- Hands-on prototype development experience, preferably with chassis systems.
- Keen ability to stay abreast of new technologies and applicability to real world implementation.
- Ability to lead a team of engineers, designers and other resources and be able to delegate and manage team activities.
- Must be detail oriented and have the ability to meet tight deadlines.
- Ability to solve problems in a fast-paced environment.
- Ability to support international and domestic travel.

Preferred Skills

- Proficient in general computer skills including MS Word, Excel, MS Project and PowerPoint.
- Ability to create reports.
- Major OEM design and release or development experience.
- Medium Truck experience.
- Military Wheeled Vehicle experience.
- Program Management experience.
- Self starter, able to work independently and in team settings to complete projects.
- Ability to handle several assignments at one time.
