

SOLDIER FOR LIFE TRANSITION ASSISTANCE PROGRAM JOB LEAD

DATE OPEN: 7/8/2016

DATE CLOSE: Until Filled

Job title: ETL Consultant with HADOOP, Duration 6 months

Location: Irvine, California

Company: Panzer Solutions

SALARY: Not Listed

SKILLS/DUTIES: Must have stronger Hadoop related experience.

Qualifications:

Required Skills and Experience:

- A BS degree in Computer Science, related technical field, or equivalent work experience; Masters preferred.

Minimum of three years' experience with the following:

- Experience architecting and integrating the Hadoop platform with traditional RDBMS data warehouses.
- Experience with major Hadoop distributions like Cloudera (preferred), HortonWorks, MapR, BigInsights, or Amazon EMR is essential.
- Experience with ETL tools such as Informatica
- Experience developing within the Hadoop platform including Java MapReduce, Hive, Pig, and Pig UDF development.

Job Descriptions:

The individual must be capable of understanding Hadoop ecosystem and the complex object design and the underlying data model of the system. The individual must be comfortable with developing data-centric applications using Hadoop tools, Netezza, Informatica, Informatica BDE (Big Data Edition), HIVE MapReduce, Spark and able to develop ETL packages, and is expected to develop queries and stored procedures involving complex database structures and Hadoop Distributed File System(HDFS). The individual must have excellent communication skills, work well in a team environment, enjoy solving complex problems and be able to work in a fast paced environment.

The Responsibilities:

- Define technical scope and objectives through research and participation in requirements-gathering and definition of processes
- Gather and process raw, structured, semi-structured, and unstructured data at scale, including writing scripts, developing programmatic interfaces against web APIs, Web logs, processing real time feeds, etc.
- Design, review, implement and optimize data transformation processes in the Hadoop (primary) and Informatica ecosystems
- Test and prototype new data integration tools, techniques and methodologies

- Adhere to all applicable development policies, procedures and standards
- Participate in functional test planning and testing for the assigned application integrations, functional areas and projects.
- Work with the team in an Agile/SCRUM environment to ensure a quality product is delivered
- Rapid response and cross-functional work to deliver appropriate resolution of technical, procedural, and operational issues.

Preferred Skills & Experience:

- Experience with logical, 3NF or Dimensional data models.
- Experience with NoSQL databases like HBase, Cassandra, Redis and MongoDB.
- Experience with Hadoop ecosystem technologies like Flume, Kafka and Spark.
- Experience with Netezza and Oracle.
- Experience with Informatica Big Data Edition.
- Certifications from Cloudera, HortonWorks and/or MapR.
- Knowledge of Java SE, Java EE, JMS, XML, XSL, Web Services and other application integration related technologies
- Familiarity with Business Intelligence tools and platforms like Datameer, Platfora, Tableau and Microstrategy a plus.
