Roush CleanTech is looking for a Sr. Design Engineer to join our alternative fuels division. The ideal Sr. Design Engineer would be a hands-on individual, who has a passion for automotive performance and a strong desire to contribute to the growing industry of alternative fuels. This position requires an individual who excels at problem solving and who has the ability to lead engineering efforts within a cross-functional team. Excellent communication and organizational skills are a must. **This position is based in Livonia, Michigan.**

Qualifications

- Bachelor's degree in Mechanical Engineering.
- Minimum of 5 years' experience as a design release engineer with a focus on powertrain systems.
- Exposure to automotive fuel systems and/or alternative energy vehicles.
- Strong working knowledge of all automotive systems with the ability to troubleshoot/diagnose automotive system issues.
- Working knowledge of various manufacturing methods: metal fabrication, metal casting, plastic injection molding, etc.
- Strong problem solving skills.
- Able to lead a cross functional team
- Must have excellent organizational skills including prioritizing work assignments.
- Able to communicate effectively, both verbally and in writing.
- Must have excellent computer skills.
