

# **SOLDIER FOR LIFE TRANSITION ASSISTANCE PROGRAM**

## **JOB LEAD**

**Company: Prestige Group**

**DATE OPEN: Immediate**

**DATE CLOSE: Long Term**

**Job title: Veterans Internship Program (Engineering)**

**Location: Auburn Hills, Michigan**

**Position Status (part time/full time): Full Time/Long Term**

**Number of Vacancies: 8**

**SALARY: \$26.25 hour to start, \$28.50 hour after 1 year of employment.  
Overtime paid at 1.5 x straight time wage.**

### **SKILLS/DUTIES:**

These positions will support full vehicle development for one of the largest global Automotive Manufactures.

An entry level engineering position is responsible for the creation and maintenance of the production bill of material in both the Clients EBOM (Electronic Bill of Materials) system and Clients CoDeP system. The system data is extremely critical to the industrial operations of Client. However, the analysis that leads to the input is critical to determining what the input should be.

To be effective, the analyst must learn the vehicles by understanding the systems and components that it takes to build them and how they are configured for sale. The analyst must be a skilled communicator as discussions with product engineers, purchasing, manufacturing, product planning, and other organizations' representatives are critical to doing the job correctly. All of those organizations and many more are affected by the data in the EBOM.

The change management specialist must possess the same qualities as described above, since there is some overlap in job responsibilities. In fact, some people do both jobs. The change specialist must fully understand the product change management process and is responsible to

make certain that changes that fall within their area of responsibility are executed properly. The change specialist will run the change management meetings for the Chief Engineer of a given vehicle and make certain that the process keeps moving so all proposed changes are positioned in a timely and accurate manner.

### **Additional Information:**

- Preference to Veterans who are currently pursuing a Bachelor's Degree in Engineering (ME or EE preferred) **Degree is NOT required to start.**
  - This program requires the applicant to obtain a Mechanical or Electrical Engineering degree.
