

PHOENIX

of Tennessee, Inc.

1001 W. Kirkland Nashville, TN 37216 Phone: (615)860-9712 Fax: (615)860-0934

Listing: October 18, 2016

Phoenix of Tennessee, main office is located in Nashville, TN. We are in the Utility and Telecommunication Construction Industries. We work on wireless, fiber, Outside Plant and civil construction projects. We have been in business for 13 years, and 6 years prior to that under another banner. We are looking for multiple positions to be filled immediately, and also within the next few months.

We offer health, dental, vision, and 401K. We give training for Competent Climbing, wireless installations, RF awareness, Osha, First Aid, Fiber splicing, Fiber pulling, boom truck operations, fork lift operations, etc.

We currently have offices in 4 markets, and are working in 6 states. Both traveling and non-traveling positions are available.

We have multiple tower technicians/climber positions to be filled. We are looking for physically fit people, that are not afraid of heights, willing to travel, and preferably with some communication, electrical, or mechanical skills. We will give them all the safety and job training required.

We need a warehouse position filled, preferably a MOS92A, but not a necessity. This does not have to be a tower technician/climber. If they have electrical or communication skills, that would be a plus, as they will be helping to assemble and test antenna.

Furthermore, we are also looking for people with construction skills for both the OSP (outside plant/fiber) and the civil divisions. They need to know how to operate heavy equipment, such as backhoes, dozers, dump trucks, boring rigs, boom trucks, etc., and are comfortable operating them in constricted areas and around utilities. We would prefer a MOS-21E, but it is not a requisite.

All applicants need to have a valid driver's license, legal citizens of the United States, or have a work card, and be able to pass a background check, a physical fitness test and a drug screening.

Please fill out an online application at www.phoenixoftn.com

Regards,

Kyle Waites
