

Business Analyst- Job ID: 11457

Troy, MI

Remove Date: August 31, 2016

Roush supplies comprehensive, integrated development services and provides customers with support that fuses technology and engineering. From design through prototyping, testing and manufacturing, we take our customers' visions from the sketch pad to production. We're focused, efficient, and we deliver. With over 3000 employees in more than 40 facilities across the United States, and interests around the world, Roush solves customers' problems and provides significant support to the automotive, performance products, military, entertainment, alternative fuels and consumer products industries. We are focused on performance, driven by technology, and committed to our customers' success. If you're only happy when your customers are happy, we want you on our team.

Are you a business analyst looking for a dynamic company to join? Due to our steady growth, we have an immediate opening for a business analyst to join our data analytics team who will be responsible for working with business functions and product teams to translate business requirements into technical requirements. The business analyst will have an in-depth understanding of business process modeling. **This position is located at our Troy, MI facility.**

Responsibilities

- Lead requirements elicitation and documentation for products
- Develop business process models and user stories (functional and non-functional)
- Develop acceptance criteria
- Establish requirements traceability
- The business analyst will work with business functions and product teams to ensure user acceptance testing issues are documented, resolved and retested
- Investigate and learn business issues and challenges, and support product owner in prioritization
- Understanding business value of product features

Qualifications

- The business analyst will have a bachelor's degree in Computer Science, Management Information Systems or equivalent degree
- Minimum 3 years' experience in a business analyst function
- In-depth understanding of business analyst fundamentals
- In-depth understanding of requirements and story development
- In-depth understanding of business process modeling
- In-depth understanding of Agile Scrum software development methodology
- Strong time management skills
- Strong collaboration and communication skills
