

Program Manager- Job ID: 11503

Troy, MI

Remove Date: August 31, 2016

Roush supplies comprehensive, integrated development services and provides customers with support that fuses technology and engineering. From design through prototyping, testing and manufacturing, we take our customers' visions from the sketch pad to production. We're focused, efficient, and we deliver. With over 3000 employees in more than 40 facilities across the United States, and interests around the world, Roush solves customers' problems and provides significant support to the automotive, performance products, military, entertainment, alternative fuels and consumer products industries. We are focused on performance, driven by technology, and committed to our customers' success. If you're only happy when your customers are happy, we want you on our team.

We have an opportunity for a Program Manager to lead multiple software and data analytics projects for our exciting and rapidly growing Digital Business. As a Program Manager you will be the central point of contact for internal and external customers and oversee data analytics services and progress of the software development team. Primary program scope involves complex analytics and software programs, new or future business awards and ensuring value to our internal and external customers. You will be responsible for program completion within determined scope, quality, time and cost constraints. You will also promote customer satisfaction by ensuring program adheres to customer specifications and contract deliverables. **This position is located at our Troy, MI facility.**

Responsibilities

- Communication of job expectations, planning, monitoring and appraising job results for customer facing software and other similar projects
- Vendor management related to software and consulting projects
- Manages internal and external customer communication.
- Coordinates resources inside and outside of the organization for accomplishing projects
- Provide project input and recommendations to chief architect
- Investigate and learn business issues and challenges, and support prioritization
- Understanding business value of product features and services

Qualifications

- Bachelor's degree in Management Information Systems or equivalent
- Minimum 5 years' experience as a Program / Project Manager
- Experience with overseeing multiple projects concurrently
- Experience with managing budgets
- Experience with job quoting
- In-depth understanding of Agile Scrum software development methodology
- Strong time management skills
- Strong collaboration and communication skills
