MEMORANDUM FOR SEE DISTRIBUTION

SUBJECT: Implementation of the Installation's New Refuse Collection Contract

1. This memorandum is to inform all units and activities of the implementation of the installation's new refuse collection contract. The following major changes will be initiated by this contract to assist the installation in meeting the DOD goal of 40-percent waste reduction by 2005:

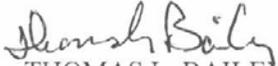

a. There will be a reduction in the total number of 8-cubic yard refuse dumpsters within the installation. A 96-gallon refuse container may replace some of the 8-cubic yard dumpsters that are assigned to administrative offices. Offices affected by this procedure will be notified of the changes.

b. Refuse dumpsters and cardboard containers will be distinctly colored and properly labeled to enhance the implementation of the mandatory cardboard recycling policy.

c. All refuse dumpsters and cardboard containers will be positioned in permanent locations. Repositioning of these containers will be accomplished by the contractor, with coordination from the Environmental Division Solid Waste/Recycling Program.

d. A transition period will occur in which the 96-gallon refuse containers and 64-gallon recycle containers (for office paper) will be replaced with the contractor containers of the same size.

2. Point of contact for questions concerning solid waste/recycling is Mr. Mike Davis, 798-9782.

THOMAS L. BAILEY
COL, EN
Director of Public Works
